

LEBOGANG SHEARAFT MAVHUNGU

SOFTWARE DEVELOPMENT ENGINEER | FULL-STACK DEVELOPMENT | ENTERPRISE INTEGRATION

Johannesburg, South Africa | South African Citizen | +27 64 848 1794 | mavhungulebogang17@gmail.com
linkedin.com/in/lebogangshearaft | github.com/lebogangshearaft | Portfolio: lebogangshearaft.github.io

PROFESSIONAL SUMMARY

Recent BSc Information Technology graduate and Junior Software Engineer with hands-on experience building full-stack applications, mobile solutions, REST and SOAP integrations, database-driven systems, and Sage X3 enterprise software. Strong foundation in Java, Python, C++, C#, TypeScript, SQL, data structures, algorithms, object-oriented design, debugging, testing, and SDLC. Led the design of an end-to-end Farm Management Solution and delivered a working mobile timesheet integration into Sage X3. Customer-focused, curious, and ownership-driven, with the ability to turn ambiguous business needs into maintainable technical solutions.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, C#, TypeScript, JavaScript, SQL
- **Computer Science Foundations:** Data structures, algorithms, object-oriented programming, problem solving, operating systems, networks, artificial intelligence
- **Backend and APIs:** Node.js, Express.js, Spring Boot, FastAPI, REST APIs, SOAP web services, authentication, JWT, role-based access
- **Frontend and Mobile:** React.js, React Native, Expo, HTML, CSS, responsive user interfaces
- **Databases and Enterprise Systems:** PostgreSQL, MySQL, SQL Server basics, data modelling, Sage X3, ERP integration, business process automation
- **Tools and Practices:** Git, GitHub, Postman, SOAP UI, Agile, SDLC, debugging, testing, technical documentation, Docker basics, AWS fundamentals

PROFESSIONAL EXPERIENCE

Rayburn Consulting | Junior Software Engineer (promoted from Software Engineer Intern) | Johannesburg, South Africa | Feb 2026 - Present

- Develop and support enterprise and ERP software, translating operational requirements into technical designs, data structures, APIs, validation rules, test cases, and documented implementation steps.
- Built a mobile agricultural timesheet application using React Native, Expo, TypeScript, Node.js, and Express, integrating user-facing workflows with Sage X3 through SOAP web services.
- Implemented and tested data flows for teams, farms, structures, plantations, activities, tasks, and timesheets; validated end-to-end Sage X3 record creation and troubleshoot failures using Postman and SOAP UI.
- Led a team on an end-to-end Farm Management Solution, owning requirements, product structure, technical planning, role-based workflows, stakeholder communication, and delivery coordination.
- Produced an interactive prototype and engineering blueprint spanning 20 operational areas, including farms, crops, tasks, workforce, timesheets, inventory, equipment, approvals, costs, reporting, integrations, audit trails, and administration.
- Coordinated frontend, backend, database, DevOps, and integration responsibilities; documented decisions and presented stakeholder-ready demonstrations.

SELECTED SOFTWARE PROJECTS

- **EduMate - Education Platform** | React.js, Node.js, Express.js, PostgreSQL | Final-Year Capstone | [GitHub](#)
Developed a full-stack education platform with REST APIs, authentication, role-aware features, PostgreSQL integration, debugging, testing, Git version control, and technical documentation.
- **Lerbow's Luxury Hair & Beauty Salon - Booking System** | Java, Spring Boot, PostgreSQL | [GitHub](#)
Built a secure booking and service-management backend using clean architecture, JWT authentication, role-based access, and REST API design.
- **Clinical Decision Support System API** | Python, FastAPI, PostgreSQL | [GitHub](#)
Designed a rule-based API with structured validation, authentication, data-management, reporting endpoints, and reliable decision logic.

EDUCATION

North-West University | Bachelor of Science in Information Technology | South Africa | Graduated May 2026

Majors: Computer Science and Information Systems. Coursework: Programming, Data Structures and Algorithms, OOP, Software Engineering, Systems Analysis and Design, Databases, Operating Systems, Networks, AI, Information Security, and Business Intelligence.

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

Sage X3 Certified API Developer; Sage X3 Certified Developer; Sage X3 Certified System Administrator – 2026
AWS AI Practitioner Certification Training; Coupa solution adviser certification – 2026,
Codecademy Full-Stack Engineer, Back-End Engineer, and Front-End Engineer Professional Certificates - 2025
Sage Intacct Certified Accounting Consultant - 2026; Full-Stack Development Certificate, FNB Code Fest Bootcamp - 2025
